## 3 REASONS WHY YOU MUST ATTEND

See how new food ingredients, processing, packaging and innovative technology can save you millions

'Test-drive' new, never-before-seen equipment just out in the market

Phase out the equipment that is not working for you and enter the new era of leaner F&B production

# TREND-SETTING MANUFACTURING SOLUTIONS

## INGREDIENTS

The food processing **INGREDIENTS MARKET** will reach

**US\$ 55 BILLION**

by 2023.

Consumer demand for healthy, flavorful and environment-friendly products are pushing the boundaries in ingredients R&D.

Plant-based proteins, probiotics, 'free-from' alternatives and sugar replacements are all the rage. Browse a range of ingredients tailor-made to your requirements of texture, taste and shelf-life.

## PROCESSING

Food and Beverage Industry **RANKS 2<sup>ND</sup> GLOBALLY** in terms of production and will reach

**US\$ 125 BILLION**

by 2025.

New processing equipment could reduce energy consumption by up to 40%

As food manufacturers look up to innovation to navigate market pressures, operational technology is on the spotlight. Experience individualized solutions for your business, including the latest flexible and modular equipment.

## PACKAGING

The global flexible packaging market will reach

**US\$ 313 BILLION**

by 2024.

Flexible packaging could use up to 85% less energy and surge your SKU uptake.

See the latest in customizable, lightweight and sustainable packaging solutions. Find out how technologies such as IoT tags, spoilage sensors and augmented reality are reshaping the industry.

## AUTOMATION & CONTROLS

The global food automation market will reach

**US\$ 46 BILLION**

by 2024.

Automation typically results in cost savings of 40-75% with payback within 1-2 years.

What does the future of factories hold? Advanced robotics, end-to-end digitalization and many other technologies of the 4th Industrial Revolution are here to create smarter and leaner production lines.

## SUPPLY CHAIN SOLUTIONS

The global cold chain market will reach

**US\$ 382 BILLION**

by 2025.

From oxygen-monitoring sensors to blockchain, startups and food giants alike are heavily invested in finding new solutions to reduce food waste and boost food safety across all stages of the supply chain.

Revolutionary technologies in the food chain are the talk of the town. Discover certification standards, cold chain advancements and new fast-delivery models.

EXPLORE TECHNOLOGIES  
FROM 60+ COUNTRIES, INCLUDING:

“ Great to interact with so many eye-opening technologies from all key global suppliers. We're taking with us lots of new business diversification ideas. ”

**Tarek Nabil** - VP Supply Chain, **Danone, France**

## BIG BUYERS VISITING THE SHOW

These and thousands more small, mid and large food processing companies from around the world will be at the show to learn, and upgrade their production lines.

“ This is a fantastic showroom of innovations which propel our business growth in this fast-changing environment. ”

**Muzaffer Tanyer**, Regional Packaging Development Manager **Unilever, Turkey**

# GET THE LATEST INSIGHTS
